Dear Mr. Marx

RE: Intermodal Facility Permit No. 2006-1014

Last night I attended an educational conference about what changes the Greater Kansas City region can expect in the quality of our water, air and traffic if this project proceeds as detailed in the Environmental Assessment. Presenting at the conference were professional experts regarding the effects of ambient air pollution on health, emission from goods movement facilities, and water contamination. As a result of the information presented, I am compelled to once again urge the Army Corps of Engineers to require an Environmental Impact Statement to fully explore the probable hazards this project presents to our regional community.

In addition, I request you extend the public comment period to allow people to digest the details and fully comprehend the impact this development will bring. It is no easy task to analyze the data as presented and respond to you in the timeframe provided.

As a final request, please notify me of any changes in the status of the permits the Army Corps of Engineers requires for this intermodal facility. My email address is:

janescaro@yahoo.com <mailto:janescaro@yahoo.com> . Thank you for your attention to my concerns.

Sincerely,

Jane M. Scaro

President

Hillsdale Environmental Loss Prevention (HELP)
